

January 31, 2008

OFFERORS:

SUBJECT: Amendment No. 1 to Request for Proposal No. REE-8-77581 for Updating
“*Studying Wind Energy/Bird Interactions: A Guidance Document*”

Amendment No. 1 provides questions and answers as follows:

Question 1: I assume NREL will coordinate the review panel’s comments and provide a single summary of the pertinent comments requiring revision, correct?

Answer 1: Yes.

Question 2: Do these Guidelines include bats?

Answer 2: The Statement of Work states that the Guidelines will not need to address nocturnal species.

Question 3: These guidelines are for on-shore projects, correct?

Answer 3: Yes.

Question 4: Reference is made to the nocturnal guidance document and that the proposed revision to the earlier guidance document should be considered as a “companion” to the nocturnal guidance document. Can you further explain what is meant by a “companion” to the nocturnal guidance? Is it understood the requested revisions will not address nocturnal species?

Answer 4: The revisions to be conducted under this work effort will be specific to diurnal species. Anyone interested in nocturnal species should refer to the other “companion” document referenced.

Sincerely,

Kim Tangler [e-sig]
